

## REMARKS

Prior to the examination of the recently filed RCE, mailed November 27, 2005, in this application, applicants respectfully request that the above amendments be entered.

Applicants appreciate the brief remarks made by the Examiner in an Advisory Action dated October 17, 2005 ("Advisory Action"). The Advisory Action stated that the "request for reconsideration has been considered but does NOT place the application in condition for allowance." Applicants respectfully disagree and believe that the claims as previously presented are allowable for the reasons set forth in the response to the previously issued final Office Action in this application, mailed September 25, 2005 (hereinafter "Response"). However, after further consideration, in order to advance the prosecution of this application, applicants have amended independent Claims 1 and 25 to further clarify the claim language. The following comments respond to the brief remarks included in the Advisory Action.

The Advisory Action remarked that Jones (U.S. Patent No. 6,654,036 B1) "teaches a **selection of graphical component**" (emphasis original). Advisory Action, page 2. The Advisory Action additionally indicated that Jones "teaches **determining a destination location to which the graphical component is moved**" (emphasis original). Advisory Action, page 2. Amended Claim 1 recites, *inter alia*, "moving, in a single step, said graphical component from the current location of the graphical component to said destination location." (Emphasis added.) As discussed in the Response, pages 6-9, with respect to Claims 1 and 25, Jones does not teach or suggest moving a graphical component to a destination location in a single step. To the contrary, Jones teaches away from moving the graphical component in a single step by stating that a window is moved incrementally. Jones, Col. 5, lines 20-32.

As also discussed in the Response with respect to Claims 1 and 25 (pages 6-9), Jones does not teach or suggest moving a graphical component to an open destination location. To the contrary, Jones teaches away from moving the graphical component to an open destination location by stating that a window is moved incrementally, overlapping windows are juxtaposed,

or the user's active window is moved to the foreground. Jones, Col. 5, lines 20-32. None of the above-mentioned manners of moving a window as disclosed by Jones teaches or suggests moving the graphical component to an open destination location. Therefore, it is respectfully submitted that amended independent Claim 1 is allowable for at least the reasons presented above.

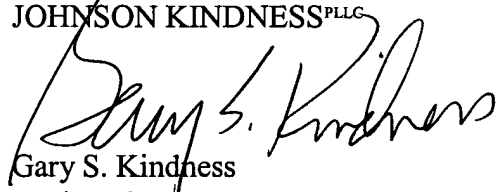

Amended independent Claim 25 recites, *inter alia*, "automatically moving, in a single step, said window to said destination location on said display." (Emphasis added.) It is submitted that amended independent Claim 25 is allowable for at least the same reasons presented above with respect to amended independent Claim 1.

The remaining claims, depending from independent Claims 1 and 25, are submitted to be allowable for at least the same reasons as presented above with respect to independent Claims 1 and 25.

If the Examiner has any questions, he is invited to contact applicants' attorney at the number set forth below.

Respectfully submitted,

CHRISTENSEN O'CONNOR  
JOHNSON KINDNESS<sup>PLLC</sup>
